QUALITY PRODUCTS

Our products are intelligently designed and crafted using the best materials and ingenuity producing quality products.

EARTH FRIENDLY

Our turf allows rainwater and waste to flow downwards freely to be filtered by the earth.

DOG APPROVED

Our turf is designed specifically for dogs to do what they naturally do on grass. They love playing and running on our turf options.

TURF PLANNING

We can assist you with your turf planning and play or park area designs.

EASY INSTALLATION

Our turf is designed to be easy to install and adaptable to your needs.

GROUND-BASED INSTALLATION

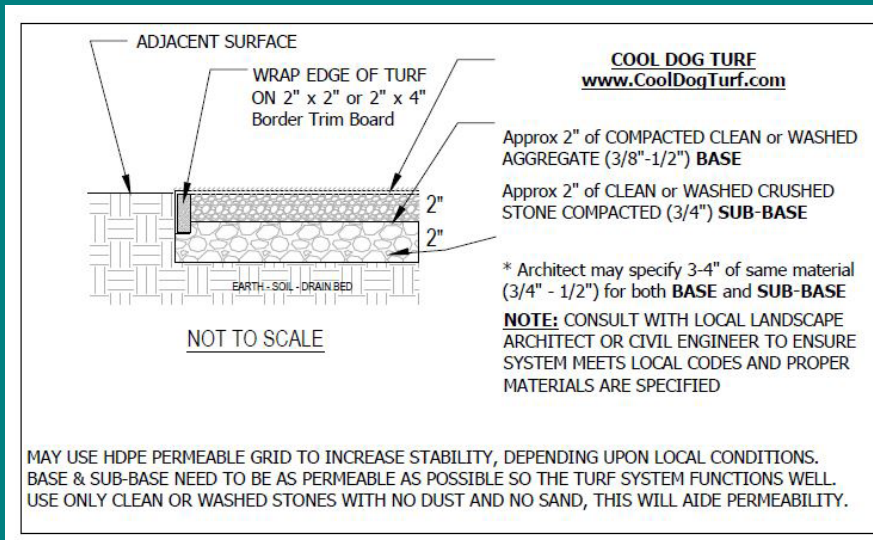

TOOLS & MATERIALS NEEDED:

- Excavating equipment such as a Bobcat, Shovel, Heavy Rake, Wheelbarrow or Carpet Dolly, Heavy Roll type or Plate Compactor
- Tape Measure, Utility Knife or Carpet Blade, Carpet Stretcher
- Turf Seam Glue, Seam Tape and a Heavy Seam Roller
- Border Board tack down nails with broad heads
- Border Trim Boards

INSTALLATION:

- Call 811 to locate any utilities
- Grade the current area
- Excavate the area to fill with aggregate stones
- If fencing needs to be placed, install fence post on outside of border boards
- Install border trim boards to attach turf to on the edges
- Compact the ground area
- (optional) install any water lines for fountains or sprinklers
- Sprinklers may be best on the edges spraying into the park
- Lay your sub base down – medium stones compacted
- Lay your base down – aggregate stones compacted
- Water the base and compact the surface well and make sure the graded area is proper and filled above trim board line
- Measure and lay the turf in place, check for seam coloring so it matches
- Glue and tape seams, stretch and tack to border trim boards

ELEVATED BASE INSTALLATION

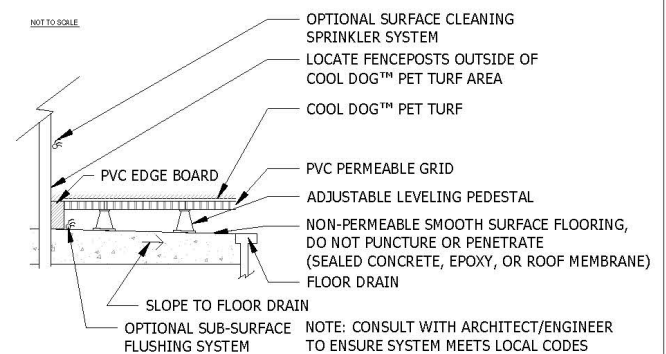

ELEVATED BASE

TOOLS & MATERIALS NEEDED:

- Elevated Systems and pedestals hardware
- Tape Measure, Utility Knife or Carpet Blade,
- Carpet Stretcher
- Turf Seam Glue, Seam Tape and Seam Roller
- Border Board tack down nails with broad heads
- Border Trim Boards

ELEVATED PLATFORM INSTALLATION

- Check for any building codes or permits, do not puncture, penetrate or disrupt any roof or floor membranes
- Install drains as needed based on slope of base floor system
- The surface area or membrane needs to be closed-cell, non-permeable surface so fluid does not absorb into surface
- If fencing needs to be placed, install fence post on outside of border boards
- Install border trim boards to attach turf to on the edges
- Install the elevated platform system without puncturing the membrane or
- (optional) install any water lines for fountains or sprinklers
- Sprinklers may be best on the edges spraying into the park so the water hits the top surface of the turf and filters down
- Check your elevated system for stability and the floor membrane for proper drainage before covering up with turf.
- Conduct a drainage test with water to make sure system drains properly
- Measure and lay the turf in place on top of elevated platform, check for seam coloring so it matches
- Glue and tape seams, stretch and tack to border trim boards

MAINTENANCE & CLEANING

All dog parks and dog play areas require regular inspection and cleaning. Any areas where dogs utilize the bathroom, should be kept clean and disinfected.

Pet turf requires regular cleaning and maintenance and inspection. You can use an artificial turf rack and pressure spay from a garden hose to clean the turf. To disinfect the turf, you can use a pet-friendly organic disinfectant, antibacterial cleaner. Regular cleaning and disinfectant of the turf will help keep the park clean and safe.

ANTI-MICROBIAL TURF HELPS ELIMINATE BACTERIA & ODORS

Our turfs are designed for outdoor use only. We do not recommend using synthetic turf indoors because of bacterial build-up and odors. We offer other surfaces for indoor use.
